

MALBEC ROSÉ 2023

— GRAPE VARIETY

100% Malbec

This wine expresses the adaptability of Malbec to create different descriptive profiles within the same variety. Originating from vineyards in Alto Agrelo, near the Mendoza River, our grapes are harvested early in February.

— WINEMAKING

We employ a gentle pressing in a pneumatic press to carefully control the acidity of the must. Subsequently, fermentation takes place at low temperatures for two weeks, preserving the natural acidity and seeking exceptional aromatic intensity. Its aging process continues in concrete tanks on its lees for 5 months.
